

Fils Aboubakar Sidik MBOHOU

Data Engineer — Work-study contract · 2 weeks in company / 1 week at EFREI · Available Sept. or Oct. 2026 · 12 months

MASTÈRE SPÉCIALISÉ DATA AND GENERATIVE AI ENGINEERING · EFREI PARIS

Angers, **Open to relocation** · +33 7 75 75 46 49 · sidikmbohoul@gmail.com · mfascyberdata.github.io · linkedin.com/in/sidikmbohoul

OBJECTIVE

MSc graduate in Cybersecurity and **Data Science** (ESAIP) with 3+ years of IT experience, including a recent internship where I redesigned the ETL strategy of a production PostgreSQL data warehouse. I am joining EFREI's Mastère Spécialisé Data & Generative AI Engineering as a work-study student and am seeking a 12-month Data Engineering position under a work-study contract. I aim to contribute to reliable data pipelines and data-driven value creation, from ingestion to visualization.

EDUCATION

Mastère Spécialisé Data and Generative AI Engineering · Post-master's (Bac+6) · RNCP Level 7 *Expected Oct. 2026 – Oct. 2027*
EFREI, graduate engineering school, Paris-Panthéon-Assas University, France

› Curriculum: Data architectures & platforms (data lake, lakehouse, streaming); AI & generative AI; Cloud, DevOps, DataOps & MLOps, infrastructure as code; Governance, security & compliance (GDPR, AI Act); Technical Leadership.

MSc Cybersecurity and Data Science · Master's level (Bac+5) *Feb. 2024 – May 2026*
ESAIP, graduate engineering school, France

MSc Technical Education, Computer Science & Engineering (first year completed) *Jun. 2022 – Dec. 2023*
IUT, Bangladesh

BSc Technical Education, Computer Science & Engineering *Jan. 2015 – Nov. 2018*
IUT, Bangladesh · CGPA 3.57/4.00 · OIC scholarship

TECHNICAL SKILLS

Data Engineering	Advanced SQL, PostgreSQL, ETL/ELT, data warehousing, data modeling & validation, Spark, Hadoop, MongoDB
Programming & ML	Python (pandas, scikit-learn, NumPy), R, TensorFlow, PyTorch, NLP, time-series forecasting, EDA
BI & Visualization	Power BI (DAX), MyReport BE, Excel (Power Query), Matplotlib, Seaborn, reporting
Cloud & DevOps	Azure (VM, AZ-900 coursework), Docker, Git, Linux, Agile/Scrum
Security & Governance	data validation & quality, GDPR, ISO/IEC 27001, EBIOS RM (ANSSI), SIEM fundamentals, digital forensics
Currently learning	Airflow, dbt, Snowflake, Databricks, BigQuery (GCP), CI/CD — targeted self-study and personal projects

PROFESSIONAL EXPERIENCE

Data Engineer — Final-Year Internship (PFE) · HortiTrace SAS, France *Nov. 2025 – May 2026*

› Migrated the ETL strategy from full reload to incremental loading (PostgreSQL, PL/pgSQL, pgAgent), cutting cycle time from 30 min to 6 min (~80%) and reducing processed volume per cycle by 95%.
› Designed a pre-aggregated historical-balance snapshot table maintained through an atomic staging-and-rename mechanism, reducing query data scan volume by 91% and reporting time (MyReport BE) by 83%; deployed on Azure VM.

IT Consultant · HPS International Consulting Plc, Cameroon *Oct. 2020 – Aug. 2022*

› Designed HR decision-support dashboards (Power BI, DAX), reducing monthly reporting time by 40%, and trained 10+ business users.

› Analyzed IT procurement data (Excel, Power Query), reducing the equipment budget by 20%.

IT Applications Analyst · Will & Brothers Consulting, Cameroon *Nov. 2019 – Oct. 2020*

› Optimized a vehicle-detection API (TensorFlow), increasing model accuracy from 73% to 88%.
› Integrated dashboards (AdminLTE) giving clients real-time inventory visibility.

Junior Programmer Intern · Alshadows Technologies, Cameroon *Jan. – Jul. 2019*

› Designed relational databases and SQL queries for two client-facing web applications.
› Contributed to application development and wrote functional specifications adopted by the team.

Store Team Member — Part-time student role (14 h/week) · Lidl, France *Since Sept. 2024*

› Weekend student job alongside my Master's studies for over a year, demonstrating organization, discipline and reliability.

KEY PROJECTS

› **Big Data Engineering:** Dockerized Hadoop/Spark cluster (HDFS, YARN, MapReduce); analysis of 20 years of food-price data in R with Prophet forecasting.
› **IoT Network Threat Detection (ML):** intrusion-detection pipeline on CSE-CIC-IDS2018 (246K flows); Random Forest, 87.9% accuracy, deployed as a Flask application.
› **Adversarial Machine Learning (PyTorch):** built, attacked (FGSM) and defended a CNN; attack success rate reduced by 38% with no loss in accuracy.

LANGUAGES & OTHER

› **Languages:** French (native) · English (B2, IELTS 6.0)
› **Other:** Driving licence B · **Interests:** AI (tech watch & data tools) · Entrepreneurship (e-commerce) · Football (weekly with ADECA)
