PROFESSIONAL SUMMARY

MSc graduate in Cybersecurity and Data Science (ESAIP Angers, 2026) with 3+ years of professional IT experience spanning consulting, data analytics, and software development, including production data engineering in France. Dual skill set covering the full data lifecycle (ETL, SQL, Python, Spark, machine learning, deep learning, Power BI) and the full security spectrum (SOC operations, SIEM, digital forensics, penetration testing, risk analysis and compliance: EBIOS RM, GDPR, ISO 27001). Delivers data systems that are fast, reliable, and secure by design, with a track record of measurable performance gains for both technical and business stakeholders.

TECHNICAL SKILLS

Data Engineering: SQL, PostgreSQL, ETL, data warehousing, Spark, Hadoop, MongoDB

Programming & ML: Python (pandas, scikit-learn), R, TensorFlow, NLP, time-series forecasting

BI & Visualization: Power BI (DAX), MyReport BE, Excel (Power Query), Matplotlib, Seaborn

Cloud & DevOps: Microsoft Azure, Docker, Git, Linux

Security: SIEM, forensics (Volatility, Autopsy), penetration testing (Nmap, Ligolo-ng), Wireshark

Governance & Risk: EBIOS RM (ANSSI), GDPR, ISO/IEC 27001, risk assessment

PROFESSIONAL EXPERIENCE

Data Engineer Intern — Final Year Project (PFE), HortiTrace SAS, France

Nov 2025–May 2026

- Migrated the ETL strategy from full reload to incremental loading, reducing cycle duration from 30 min to 6 min (-80%) and volume processed per cycle by 95%.
- Designed a pre-aggregated historical balance snapshot table, maintained by an atomic staging-rename mechanism, reducing query scan by 91% and reporting time by 83%.
- Tools: PostgreSQL 17 · PL/pgSQL · pgAgent · MyReport BE · Azure VM · TrackOnline (OData)

IT Consultant, HPS International Consulting Plc, Cameroon

Oct 2020–Aug 2022

- Analyzed IT procurement data (Excel: PivotTables, Power Query), identifying inefficiencies that cut the equipment budget by 20%.
- Built HR dashboards (Power BI, DAX) cutting reporting time by 40%; trained 10+ users.

IT Applications Analyst, Will & Brothers Consulting, Cameroon

Nov 2019–Oct 2020

- Improved a vehicle detection API (computer vision, TensorFlow), raising prediction accuracy from 73% to 88%.

Junior Programmer & Technology Analyst (Intern), Alshadows Technologies, Cameroon

Jan–Jul 2019

- Configured relational databases and SQL queries supporting two client-facing web applications.

KEY PROJECTS

- **IoT Network Threat Detection (ML):** intrusion-detection pipeline on CSE-CIC-IDS2018 (246K flows); Random Forest, 87.9% accuracy, deployed as a Flask scoring app.
- **Adversarial Machine Learning (PyTorch):** built, attacked (FGSM), and defended a CNN; attack success reduced 38% with zero clean-accuracy loss.
- **SIEM & Security Operations Labs:** deployed Wazuh XDR and AlienVault OSSIM/OSSEC (FIM, OpenVAS, MITRE ATT&CK detections); red-team: command-injection exploit and Ligolo-ng network pivoting.
- **Big Data Engineering Labs:** Dockerized Hadoop/Spark cluster (HDFS, YARN, MapReduce); 20-year food-price analytics in R with Prophet forecasting.

EDUCATION & CERTIFICATIONS

MSc Cybersecurity & Data Science, ESAIP School of Engineering, France

Feb 2024–May 2026

Coursework: intrusion detection & SOC, digital forensics, penetration testing (CEH), cryptography, neural networks & deep learning, Big Data, NoSQL, CCNA 1–2, cloud (AZ-900), project management

MSc Technical Education, Computer Science & Engineering (first year), IUT Dhaka

2022–2023

BSc Technical Education, Computer Science & Engineering, IUT Dhaka, Bangladesh · OIC scholarship

2015–2018

IBM Data Engineering Professional Certificate — Coursera (in progress, Sep 2026)

ADDITIONAL

French (fluent) · English (B2, IELTS 6.0) · Driving license B · Interests: football, AI, entrepreneurship
